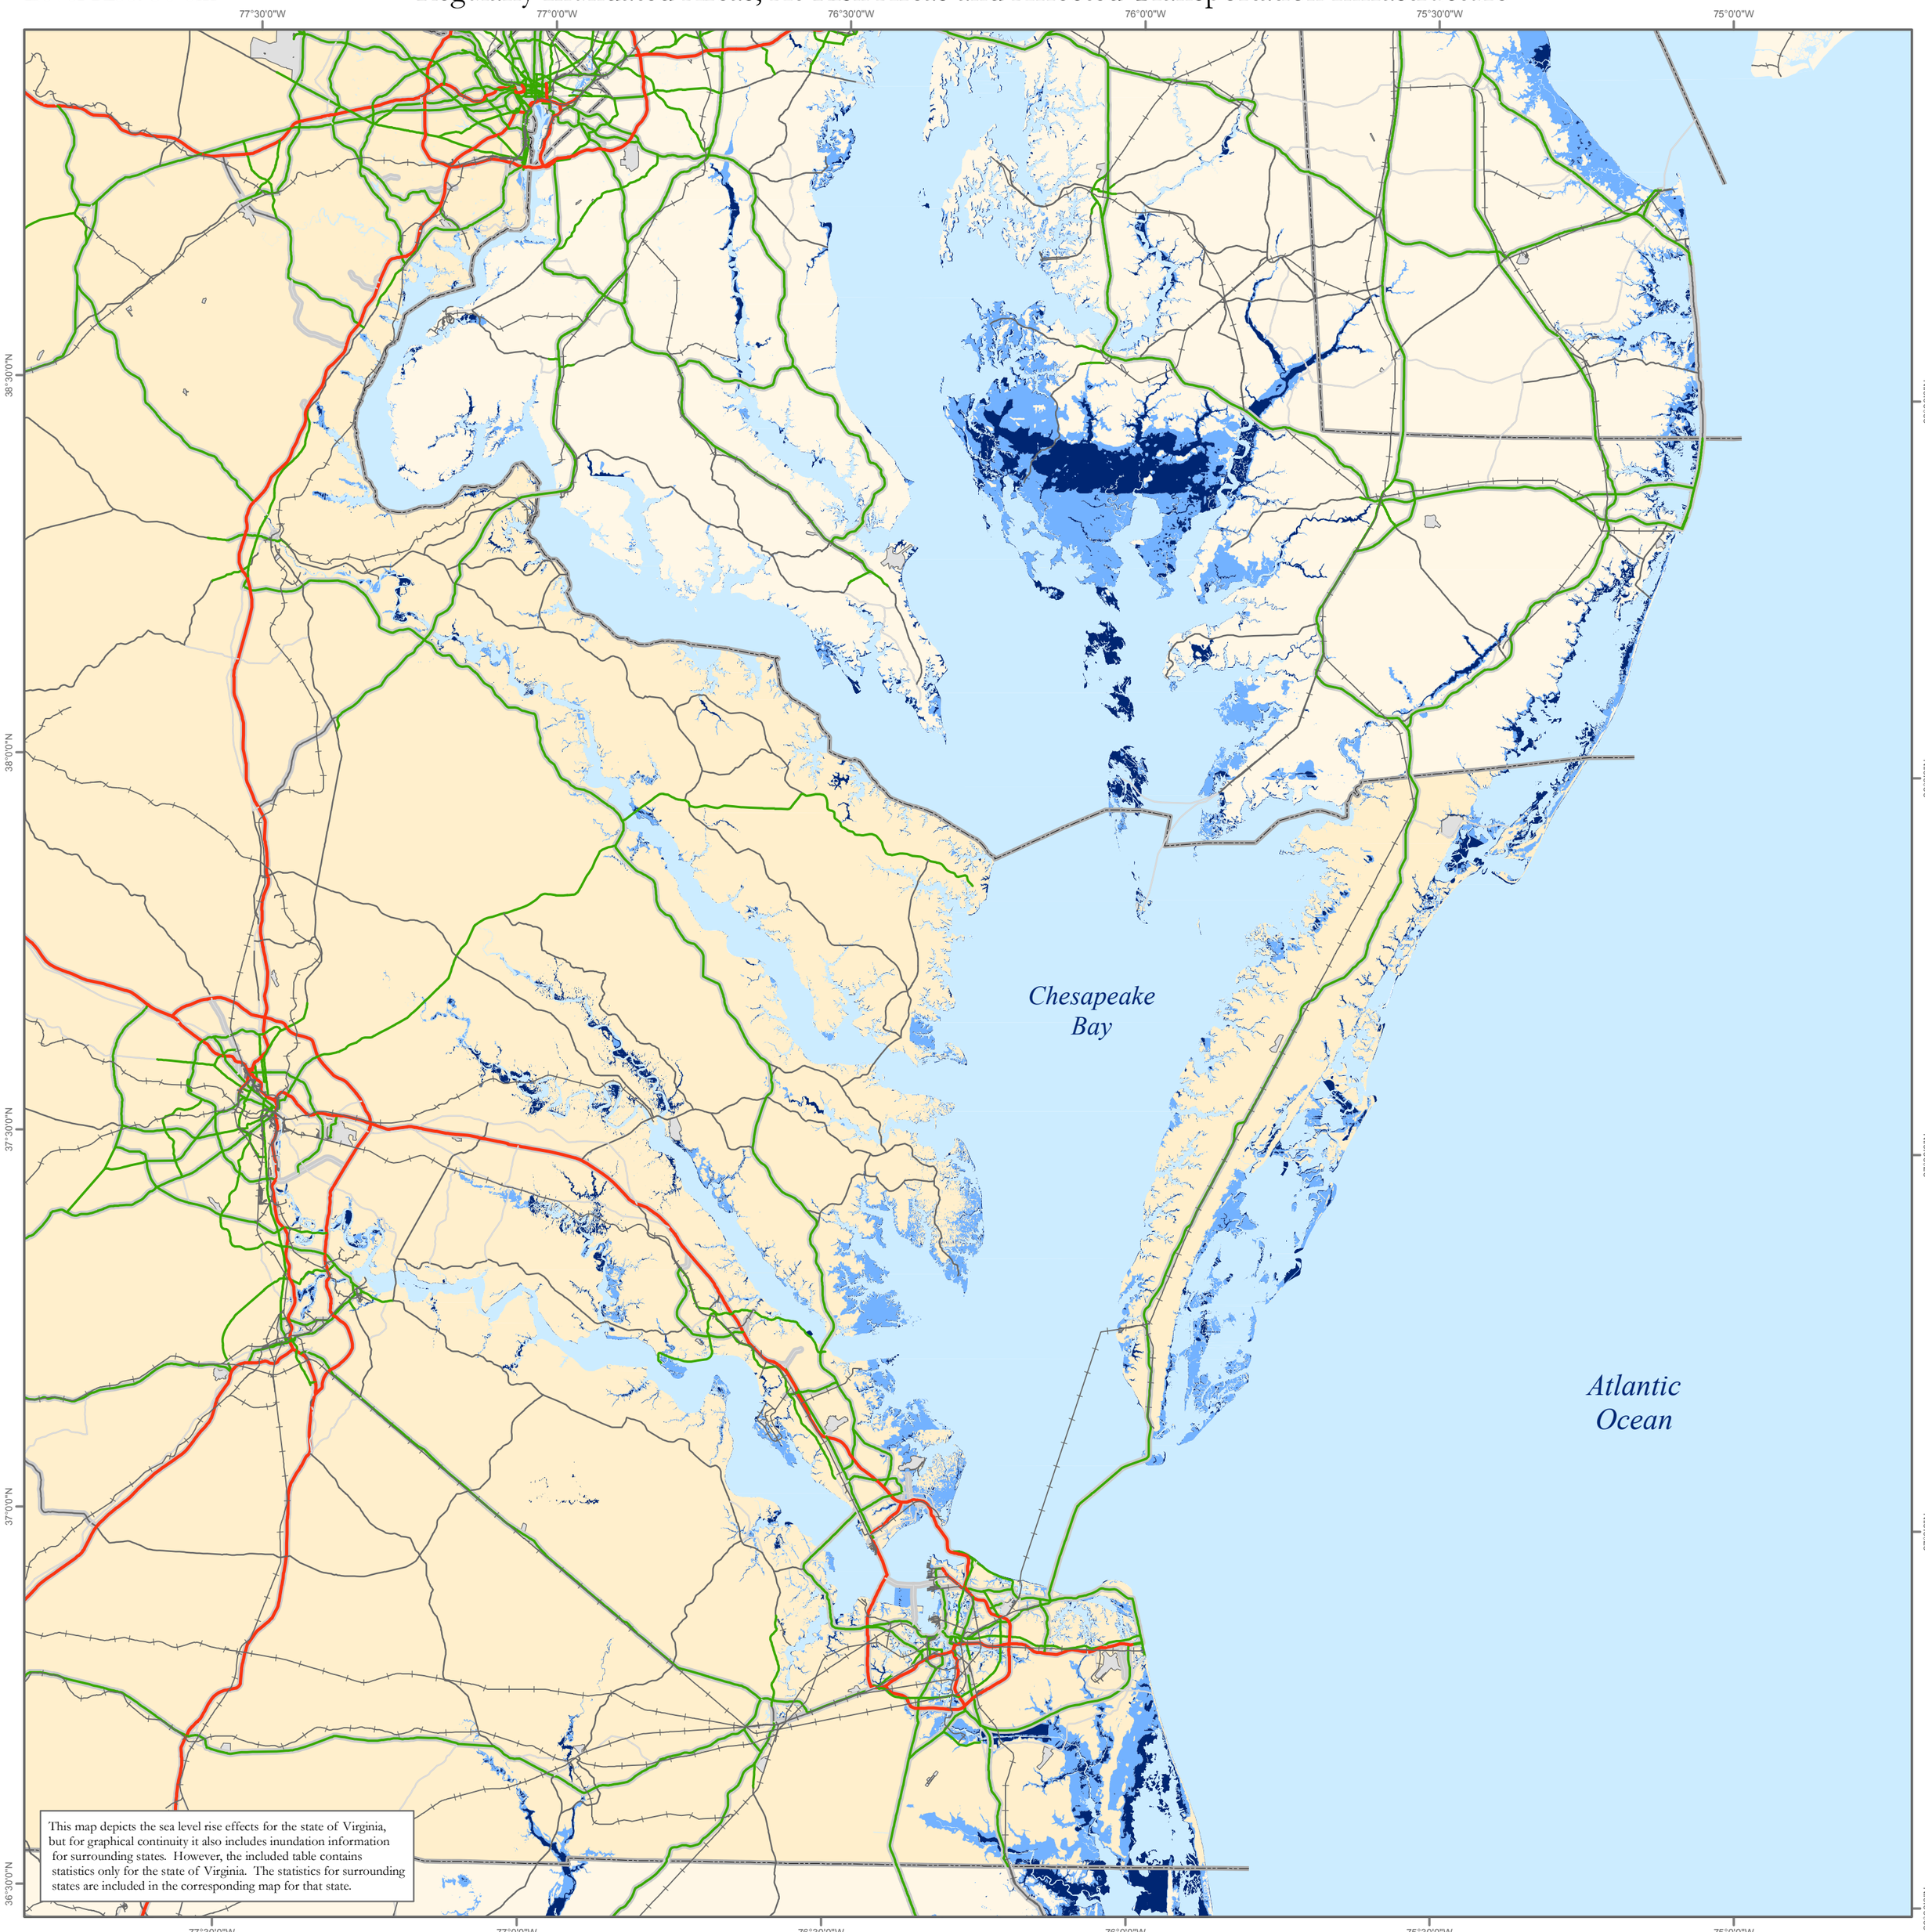
Eustatic Sea
Level Rise: 30 cm

State of Virginia

Regularly Inundated Areas, At-Risk Areas and Affected Transportation Infrastructure



Regularly Inundated Area
At-Risk Area
Airport Property
Ports Property Area
Interstate Highway
Non-Interstate Principal Arterial
Minor Arterial
NHS (indicated by background)
Railroad

N

Potentially Impacted Transportation Network

Type	Inundated	At-Risk
Roads (km)		
Interstate Highways	3.5	16.7
Non-Interstate Principal Arterials	8.4	51.0
Minor Arterials	1.1	8.1
National Highway System Features	10.5	59.6
Other Transportation Types (km)		
Railroads	9.0	61.1
Potentially Impacted Land Area (acres)		
Total Impacted Area	100,000	265,469
Airport Property Area	89	1,310
Airport Runway Area	5	138
Ports Property Area	114	307

Notes:
The methodologies and source data used to generate these maps are discussed in *The Potential Impacts of Global Sea Level Rise onTransportation Infrastructure: Study Goals, Methodologies, and Recommendations.* This report also lists summary statistics for the transportation infrastructure affected according to this analysis. These maps are presented as an *estimate* of areas that, without protection, may regularly be inundated or may be at-risk of periodic inundation due to storm surge, under the methodologies used in this study. These maps are not intended for navigational or engineering purposes, and are meant to provide a rough idea of the areas and transportation facilities that might be affected under the scenarios and methodologies used in this study.

***Eustatic** sea level rise refers to the change in sea level created by any volumetric increase in the oceans worldwide, primarily due to thermal expansion and ice melt.
